

Strong number:-

A Strong number is a number in which the sum of the factorial of each digit = the number itself.

• factorial.

-factorial of a number n (written as $n!$) means:

$$n! = n \times (n-1) \times (n-2) \times \dots \times 1$$

Example

$$5! = 5 \times 4 \times 3 \times 2 \times 1 = 120$$

Example of Strong Number

check:

$$1! = 1$$

$$4! = 24$$

$$5! = 120$$

$$\text{Sum} = 1 + 24 + 120 = 145$$

2. perfect Number.

→ A Perfect Number is a number in which the sum of its

Positive divisors = the number

Divisors of 6 (Example).

$$1, 2, 3$$

$$\text{Sum} = 1 + 2 + 3 = 6 \text{ (perfect number)}$$
